ABSTRACT

A system, method and computer program product are disclosed for a bulletin board

10   feature in a supply chain management framework. Utilizing a network, data is collected

from a plurality of stores of a supply chain. A network-based interface is also displayed

for allowing access to the data. An electronic order form is generated based on the data

utilizing the network-based interface for ordering goods from selected distributors of the

supply chain. The network-based interface includes a bulletin board displaying

15   information received from each of the stores. The received information relates to the

distributors for facilitating the selection of the distributors.
